Leadership in Data Management and Storage

Dedicated to Your Success
Now and Into the Future

Our Customers
In a world where technology is changing our everyday lives, digital transformation tops the strategic agenda in most organizations. For organizations to be successful in their digital transformations, data must become the lifeblood of an organization, seamlessly flowing through it to optimize operations, create innovative business opportunities and enable new customer touchpoints through technology.

Correspondingly, IT leaders are under tremendous pressure to harness today’s wealth of data and apply it to create new value across the entire organization—all with limited time, skills and budget. No longer is data locked away on devices hidden behind firewalls. Instead, it is becoming distributed, dynamic and diverse.

Thriving in this environment requires creating a data-centric organization, which is no small undertaking. And a holistic approach to managing data that is secure, efficient, future-proof and provides freedom of choice.

NetApp Data Fabric
NetApp Data Fabric simplifies and integrates data management across cloud and on-premises to accelerate digital transformation. It delivers consistent and integrated data management services and applications for data visibility and insights, data access and control, and data protection and security. And unleashes the power of data to achieve a new competitive advantage.

Our Portfolio
Flash plays a key role in customers’ digital transformation efforts as they seek to gain advantage through greater speed, responsiveness and value from key business applications—all while lowering total cost of ownership. All-flash array technology is the de facto choice as customers seek performance and economic benefits from replacing hard disk installations. With a highly differentiated and broad portfolio of all-flash and hybrid array offerings, NetApp is well positioned to enable customers to accomplish this transition.

Budget constraints and skill imbalances lead our customers to seek help in integrating, deploying and managing the solutions they need to stay competitive. This drives demand for converged and hyper-converged infrastructure solutions. FlexPod is the converged infrastructure of choice for many of the largest enterprises around the globe. Customers can break free from the limits of first-generation HCI with NetApp HCI and attain guaranteed performance with unmatched flexibility, scale, automation, and integration with the Data Fabric.

Customers are attracted by the speed and scale benefits of the public cloud but need new data management capabilities to keep control of data as it moves beyond the walls of the enterprise. NetApp believes the hybrid cloud is fast becoming the dominant model for enterprise IT. Our Data Fabric approach enables our customers to manage, secure and protect their data from on-premises to public to hybrid clouds, all at the scale needed to accommodate the exponential data growth of the digital world.

Our Company
NetApp is the data authority for hybrid cloud. We provide a full range of hybrid cloud data services that simplify management of applications and data across cloud and on-premises environments to accelerate digital transformation. Together with our partners, we empower global organizations to unleash the full potential of their data to expand customer touchpoints, foster greater innovation and optimize their operations.

Company Snapshot

10,000+ employees, 110+ offices

Fastest growing top 6
All-Flash Array vendor

Leader in 4 Gartner
Magic Quadrants

1 IDC, Worldwide Quarterly Enterprise Storage Systems Tracker – 2017Q1, June 8, 2017 (Top 5 AFA vendor – Year over Year revenue growth; #1 Branded Storage OS – revenue and capacity share)
**Full-Time University Graduate Program**

NetApp’s University Graduate Hire Program is designed to enhance the experiences for our University Graduates Hires as they transition from the campus to corporate environment. The program aspires to build a community for all the University Graduate Hires through networking, philanthropy and professional development events.

**Intern Program**

NetApp provides a rich, real-world career experience for its interns across the globe. We see these opportunities as a true win-win experience for both the student, who is able to experience the corporate environment and contribute meaningful work, and the organization, which benefits from fresh perspectives and thinking. The internship program also develops a robust new college graduate talent pipeline for the entire organization.

**Types of Roles**

We are looking to fill full-time and intern positions throughout our business, which includes Customer Support, Engineering, Finance, Human Resources, IT, Legal, Product Management, Program Management, Sales, Solutions Engineering, and Technical Marketing.

**Locations**

The majority of our technical and non-technical opportunities are located in the following locations:

- Boulder, Colorado
- Pittsburgh, Pennsylvania
- Research Triangle Park, North Carolina
- Sunnyvale, California (Headquarters)
- Vancouver, British Columbia
- Vienna, Virginia
- Waltham, Massachusetts
- Wichita, Kansas

We have additional opportunities in Texas, New York and other various locations across the United States and Canada.
